Best season car. I hope Codemasters will bring Lancia 037 Evo 2 in season 2 first week.. Had i not impulsively bought this car based on looks alone i would have known it was both extremely powerful and rear wheel drive, meaning that the car spins out if you look at it funny and it has a tendency to kill you very, very quickly. My poor driving skills aside, my main point is that it looks nice, and really that's all that matters in a Rally game, that the paramedics have something pleasant to scrape my charred remains off of fifteen seconds after the race starts.. This mid-engined monster is an incredibly fun and balanced car to drive. The sound of 6 screaming inline cylinders is music to my ears.
